Butuan City, Philippines | +63 970 9788 445 | balazolawrence@gmail.com | Portfolio: renzuokooo.github.io/balazo_eportfolio/

PROFESSIONAL SUMMARY

Bachelor of Science in Information Systems graduate aspiring to begin a career as a Junior Game Developer, with a focus on game design and gameplay programming. Developing practical skills in C, HTML, CSS, and JavaScript, with experience creating interactive game prototypes, implementing gameplay mechanics, managing player choices, and debugging program logic. Interested in combining creativity and programming to create engaging and meaningful player experiences.

EDUCATION

Caraga State University — Bachelor of Science in Information Systems — 2024–2026

FSUU Bp. Pueblos Senior High School — STEM Strand — 2022–2024

PROJECT EXPERIENCE

Choose Your Fate — Web Game Prototype

- Developed an interactive browser-based game prototype using HTML, CSS, and JavaScript.
- Implemented player health, coins, score, randomized outcomes, branching choices, win/lose conditions, and restart functionality.
- Applied event-driven programming and basic game-state management to connect player actions with changing outcomes.

Word Hunt Navigation — C Console Game

- Developed a 5x5 grid-based console game using C, arrays, loops, functions, and conditional logic.
- Implemented player movement, target detection, boundary handling, invalid-input handling, and a three-life system.

RPG Character Creation — C Game System

- Developed a console-based RPG character creation prototype using C and conditional logic.
- Implemented three character classes, two weapon options per class, Attack/Defense focus choices, and conditional starting attributes.

CERTIFICATIONS

Sololearn — Coding Foundations — Course Certificate — October 26, 2024

Sololearn — Introduction to Python — Course Certificate — October 27, 2024

TECHNICAL SKILLS

Game Development: Game Design, Gameplay Programming, Gameplay Mechanics, Player Choice Systems, Basic RPG Systems

Programming: C, HTML, CSS, JavaScript, Python (Foundations)

Development: Debugging, Testing, Input Handling, Logical Problem-Solving, Program Development

CORE COMPETENCIES

Creative Thinking | Problem-Solving | Communication | Teamwork | Adaptability | Willingness to Learn | Work Ethic
